PROFESSIONAL SUMMARY

Software engineer with over 5 years of experience building secure, scalable web applications across Angular, TypeScript, and modern backend technologies. Experienced in designing REST-driven applications, implementing secure authentication and authorization, CI/CD pipelines, offline-first architectures, and reusable platform libraries. Currently expanding expertise in Laravel and Flutter to deliver end-to-end product features.

SKILLS

- Languages: PHP, TypeScript, JavaScript, Dart, SQL.
- Frameworks: Laravel, Angular, Flutter, Vue.js, React Native, NestJS.
- Databases: PostgreSQL, MySQL, MongoDB, Firestore.
- Tools and platforms: Postman, Swagger, Storybook, Git, Figma, AWS, GCP, Linux.
- Others: CI/CD, Technical Documentation, Problem-solving, Collaboration, and Communication.

WORK EXPERIENCE

Software Developer - Zeraki, Nairobi

May 2021 - January 2026

- Led frontend development of Zeraki Finance, a school accounting solution serving 1,000+ schools across Kenya and Uganda, with deep integration to backend REST APIs, including payment processing via banks and MPesa, and SMS notifications.
- Mentored and guided junior developers through code reviews and one-on-one sessions, participated in hiring processes (screening and interviewing candidates), and delivered technical presentations on topics such as offline-first architecture and A/B testing.
- Collaborated with backend teams on API design and data modeling, optimizing slow queries and endpoints that cut reports and dashboard loading times by 30%.
- Implemented comprehensive security best practices, including rate limiting, reCAPTCHA integration, input validation and sanitization, session timeouts, privacy blurs, and role-based access control (RBAC), reducing attack vectors and enhancing secure user access and data protection.
- Incrementally led Angular framework upgrades from version 12 towards 19, and migrated the UI from Bootstrap to Tailwind CSS, ensuring the application remained current with modern best practices and performance improvements.
- Contributed to pioneering company guidelines on AI-enabled development, such as AI-enabled code generation, analysis and review tools, and also AI feature integrations such as customer support chatbots.
- Established CI/CD pipelines with Bitbucket for automated testing and deployment, enabling seamless continuous delivery and accelerating the release cycle by over 40%.

OPEN SOURCE CONTRIBUTIONS

ng-bootstrap (Angular UI library) - [PR #4845 – Add "Copy to clipboard" functionality](#) • [Issue #4826](#)

- Implemented a global "Copy to clipboard" feature for code snippets across the official ng-bootstrap documentation site, leading to an improved experience for thousands of developers.
- Collaborated with project maintainers, followed contribution guidelines, and responded to review feedback to ensure code quality and maintainability.

PERSONAL PROJECTS

Bulk SMS Manager Application - 🔗 <https://github.com/ezekiel-charo/bulk-sms-manager>

Tech Stack: PHP, Laravel, InertiaJs, VueJs, Tailwind, MySQL

A production-grade full-stack messaging app to simplify customer engagement via bulk SMS.

- Developed a complete contact management system to send SMS in bulk and track delivery history.

- Integrated Africa's Talking SMS API to facilitate high-volume SMS dispatching.
- Implemented a modern, maintainable SPA architecture with Inertia.js and reusable Vue components.

EasePOS - Point of Sale - @ <https://ease-pos.web.app>, <https://github.com/ezekiel-charo/ease-point-of-sale>

Tech Stack: Angular, CapacitorJS, Firebase, Bootstrap

A simple Point of Sale web application. (Demo username: 'ezekiel3499@gmail.com', password: 'password')

- Integrated Firebase Authentication for user identity verification and data security, alongside Firestore for efficient and reliable application data storage.
- Streamlined Angular code for Android with CapacitorJS, promoting code sharing and delivering a native-like experience with reduced development complexity.
- Built a responsive UI that worked seamlessly on mobile web, desktop, and as an Android app.

Money Manager - @ money-manager-101.web.app, github.com/ezekiel-charo/personal-finance-manager

Tech Stack: AngularCDK, Tailwind CSS, PouchDB, Jasmine

- Developed an offline-first expense tracker with Angular and PouchDB, ensuring an uninterrupted user experience across all connectivity levels with seamless data synchronization.
- Built modular UI components using Angular CDK and Tailwind CSS, enabling rapid feature delivery while maintaining codebase scalability and maintainability.
- Implemented a comprehensive testing suite with Karma and Jasmine, writing unit tests for core services and components to ensure functionality and code reliability.

Journal App - @ <https://github.com/ezekiel-charo/Journal>

Tech Stack: React Native, NestJS, PostgreSQL

- Architected and built a production-ready RESTful API using NestJS, PostgreSQL, and TypeORM, implementing authentication (JWT), authorization, CRUD operations, and database relations.
- Designed a normalized database schema with proper foreign key constraints, indexing strategy, and efficient queries using TypeORM query builder for optimal performance.
- Implemented comprehensive input validation with class-validator, error handling middleware, and documented all endpoints with Postman collections for seamless API consumption.

EDUCATION

Masinde Muliro University of Science and Technology

BSc. Information Technology

2015 - 2019
